11/23/68

Dear Paul (sc Gary),

Those things I have recently communicated to you or that you may have deduced must be kept strictly confidential, for there could otherwise be the suffering of innocents.

In between other things of an emergency nature, I have almost cleaned up what I brought back, save for typing those notes I'll have time for. I got your 11/21 mailing today and will read enclosures.

As soon as I can I'll be sending you a few other things by surface mail. No rush on them.

Enclosed is a copy of a letter to Moo. If you agree with it and have anything else on it, I should have it by the first of next week, in N.O., c/o Matt Herron, unless it will reach here by Saturday's mail. If I do not get to go to N.O. Matt will forward.

Hope your interview with JR was possible and successful by the time you get this. Gary now has the film and will be making copies you will eventually get. He is going to try and number the frames, so we can comment among each other with fixed references.

On the basis of the FBI reports I disagree with your suggestion that there were only three different views. The agents not regularly on the case made repeated reference to six different views, in at least one of which there was no Oswald. Perhaps by the time you get this you'll know why 17. That is a strange number, not divisible by three of six.

Of those things I have seen, I now know that Mark conducted one incomplete and very minor investigation of OswaldIs Mexican Tourist Card. This seems to be how Mart qualified as an "investigator", by accompanying Mark. There is no reference to Mort in the almost meaningless two pages of it. Gary Sanders followed up three months later and left the confusing indefiniteness more confusing and self-contradictory. He was no help and cost money I think was wasted.

Hastily,
